### Clean Up Portland Harbor

Letter

Dr. Ms. McCarthy, The proposed cleanup of the Portland Harbor is a big win for industry and a bad deal for the public. EPA's cleanup proposal tackles just 8% of a site area that is 100% toxic. A more aggressive plan is needed to prevent even more harm to human health and the environment. On behalf of all people who rely on the river for food, recreation, employment and culture, I urge the EPA to implement a plan that: Moves quickly and sustainably reduces contaminants causing harm to Willamette and Columbia River resources. Includes ongoing monitoring and cleanup upriver and downriver from the site. Contributes to healthy fish that are safe to eat for all people. Holds polluters accountable for creating a safer Portland Harbor. These elements get us closer to the plan our communities deserve. And I deserve a clean, safe Portland Harbor. \*Submitted during the comment period between June 9, 2016 to August 8, 2016 regarding the EPA's Portland Harbor Feasibility Study and Proposed Plan.

I have worked with the EPA extensively as a developer of a brownfield site in NE Portland and have been impressed with the commitment and caring of EPA's staff. I'm startled and dissappointed to delve into this plan and see what an incomplete, and insufficient remediation plan it is. I hope that the EPA's process works for the greater good, the publics outcry is heard, and the plan is revised in order to cleanup more of the site, more thoroughly, and with a more aggressive timetable. Thanks!
